

PipeMat™

PipeMat™ is a mat made of High Density Polyethylene pipes. The mat can be used as subsea support, landing and positioning device or seabed/ pipeline/cable protection for lighter loads. The PipeMat™ is free from sharp edges and rigid parts and is therefore a very safe alternative to similar installation and protection products.

The PipeMat™ can easily be rolled up for transport and storage.

Dimensions and characteristics for PipeMat™:

Type	Dimensions[mm]	Weight in air /seawater [kg]
PipeMat16*	4000x4000x50	360/71

*The dimension above is our standard mat.
Custom design is possible upon client's request.
