

# Protection cover

## Description

The cover protects products during installation.

Utilisation of Clamp Protection Cover will ensure that no sharp edges or stud bolts are exposed. Significant reduction of the risk of damaging equipment in the close vicinity of the riser is achieved.

- Product is custom design according to specification
- Similar applications can be protected
- Machined or moulded
- Held together by INCONEL® or KEVLAR® straps
- Material: Polyurethane, Elasturan, 80 shore
